

## Valvoline - DOT 3 & 4 Brake Fluid

### Helps reduce the risk of brake failure for most ABS, disc or drum brakes

.....

SynPower High Performance Synthetic Brake Fluid is recommended for ABS, hydraulic drum and disc braking systems and hydraulic clutches requiring DOT 3 and DOT 4 fluids. Its premium, synthetic, low-moisture formulation provides superior anti-vapor lock protection. It has a high dry-boiling point up to 500°F that reduces the risk of fluid vaporization and possible brake failure.

- Exceeds DOT 3 and DOT 4 specifications
- For most ABS, disc or drum brake systems
- High boiling point reduces risk of brake failure
- Compatible with conventional brake fluids

### How to Use

.....

Follow vehicle manufacturer's recommendations when adding brake fluid. Keep brake fluid clean and dry. Contamination with dirt, water or petroleum products may result in brake failure or costly repairs. Store brake fluid only in its original container. Keep container clean and tightly closed to prevent absorption of moisture. Do not refill or reuse container.

### How it Works

.....

Premium, low-moisture formulation with a dry equilibrium reflux boiling point greater than 500° F provides superior performance even under severe conditions.

### Sizes and Grades

.....

Name	DOT 3 & 4 Brake Fluid
Size	12 oz
Part	057
UPC	74130-00057

Name	DOT 3 & 4 Brake Fluid
Size	32 oz
Part	059
UPC	74130-00059
